The Ed Lab's Moodle 2 Eco-System | The New Learning Eco-System

File Integration:
Personal Dropbox Account
Google Docs
Own File Storage (no longer by
course)

1st Big Improvement: File Integration

- Files are grouped by user NOT course
- Dropbox and Google Docs connect directly

Easily Post & Track Lesson Plans

- Teachers can post and track lesson plans in multiple formats
 - Built in module to post daily lesson plans (saves each day)

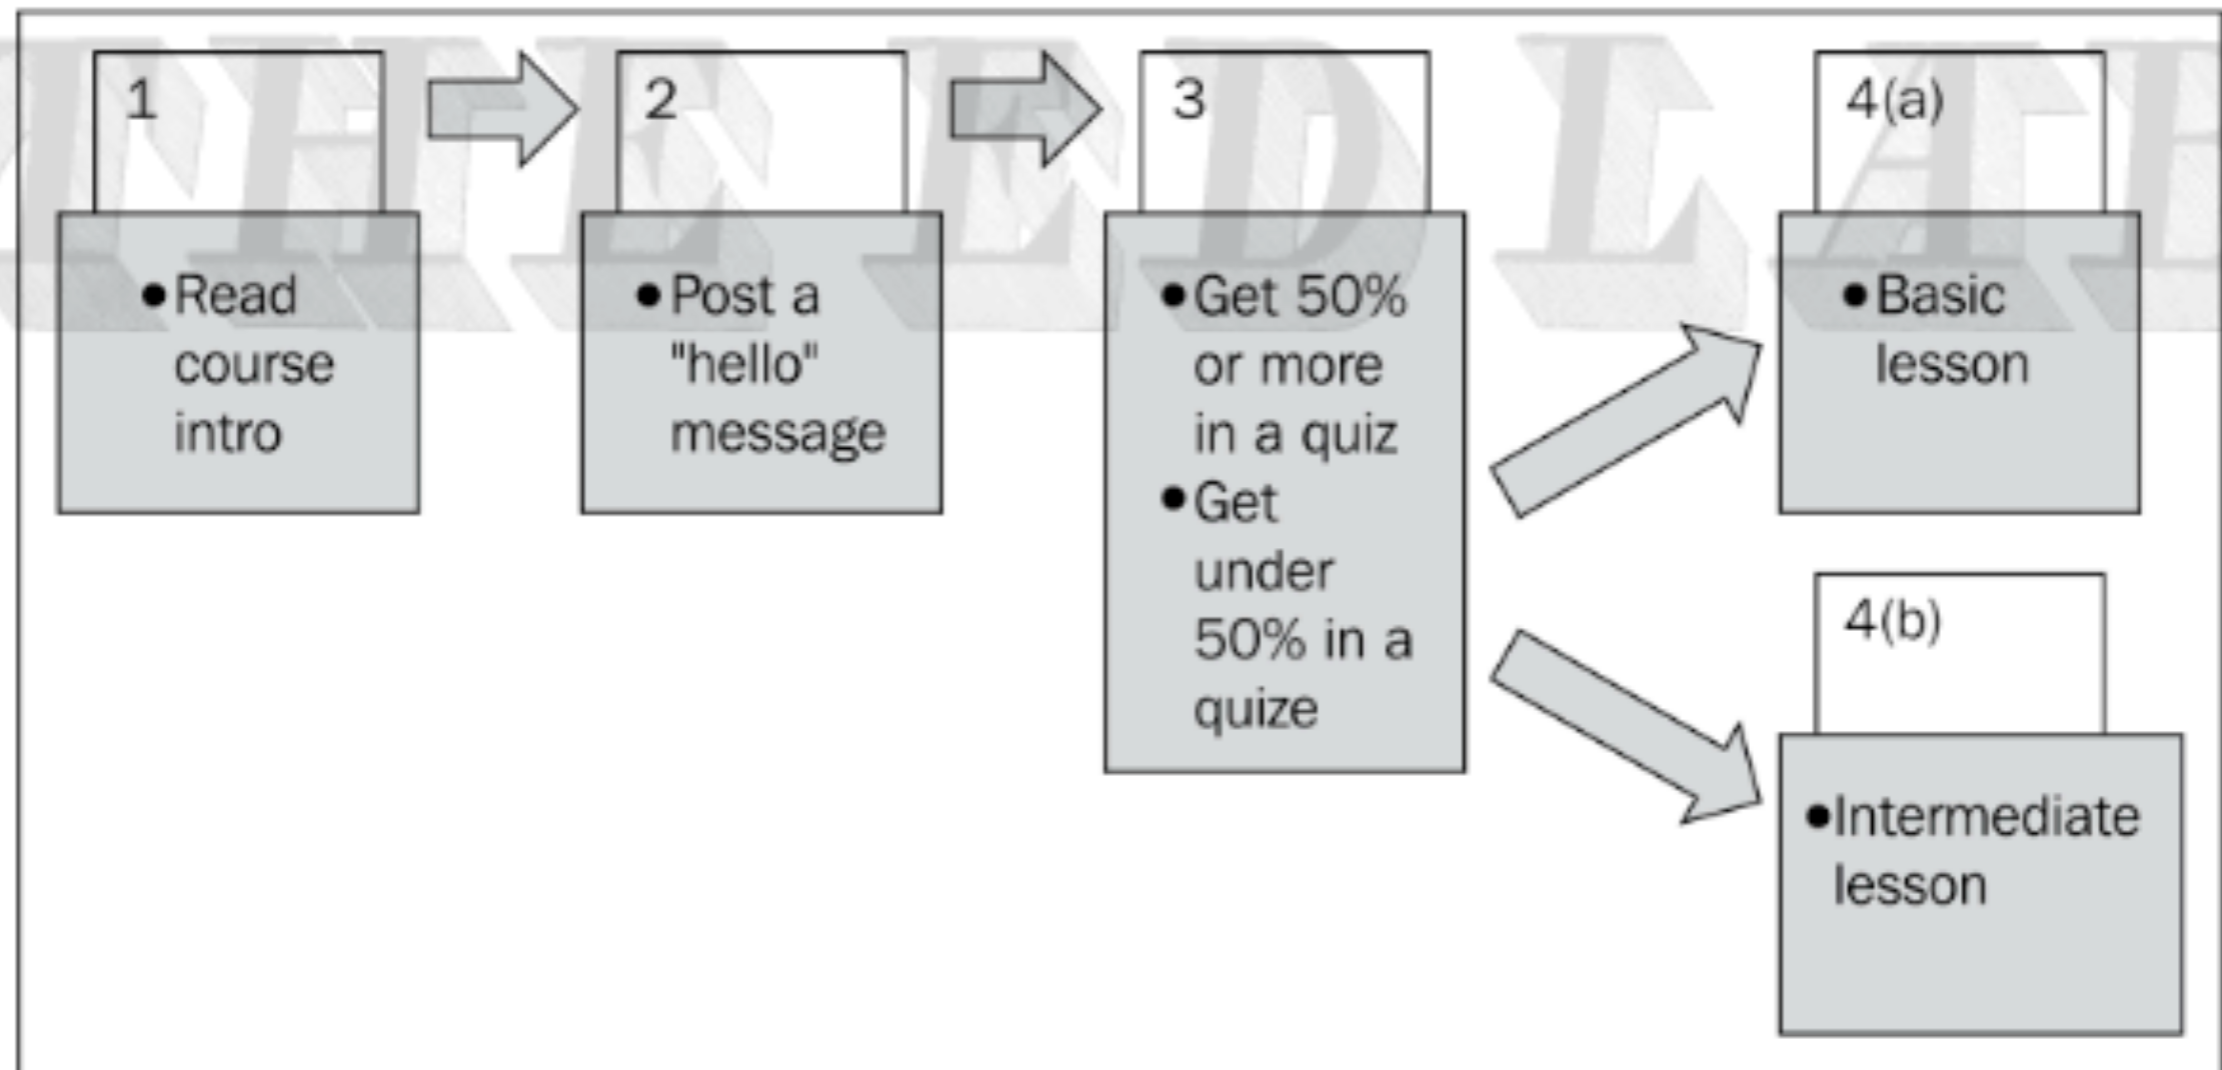

Track course completion
Automatically differentiate based
on performance
Grade using
rubrics

2nd Big Improvement: Tracking

- Teachers can track course completion
- Teachers can automate their differentiated instruction
 - Based on student performance different assignments can be available
 - Grade using pre-defined (and shared) rubrics

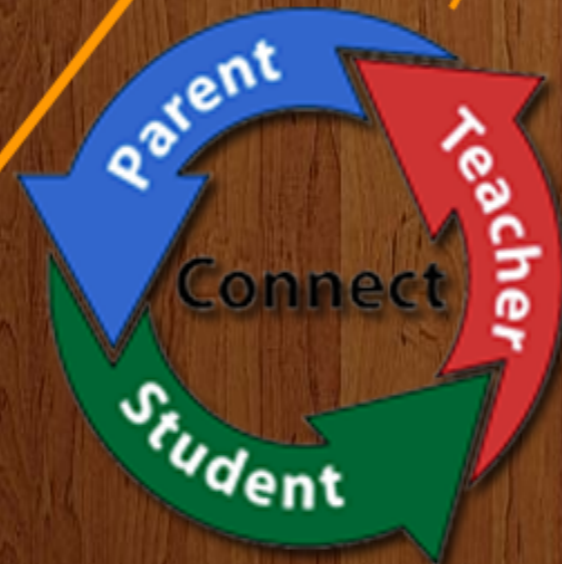

Differentiate

Track curriculum
competencies based
on completed work
and grades

Tracking (Con't)

Parents, students, and teacher can communicate through Moodle and track progress

Connecting & Communicating

Built into the system:
